Nuclear analyses of some eneolithic gold artifacts discovered in the Călărași district, Romania

Viorel Cojocaru, Done Serbănescu

Rezumat: Autorii se referă la analizele nucleare la care au fost supuse câteva piese din aur eneolitice din colecția Muzeului de Arheologie Oltenița. Este vorba de artefacte provenind de la Gumelnița, Sultana Vlădiceasca, Chirnogi.

Abstract: In the rich collections from the Aeneolithic belonging to the Museum of Archaeology, Oltenița, there are some gold artifacts, which have not been tillnow analyzed in order to put in evidence the elements associated with gold. The objects that were analyzed are from Gumelnița, Sultana Vlădiceasca, Chirnogi.
